

MANN-FILTER

Product Information

No. 158
05.08.2020

MANN-FILTER replaces C 16 134/1 by C 16 134/2

The C 16 134/2 will replace the C 16 134/1 in the air filter program of MANN-FILTER. The difference between the two filters is the omission of the positioning nose at the end plate of the C 16 134/2

C 16 134/1 with positioning nose

C 16 134/2 without positioning nose

The omission of the nose simplifies the mounting process, as no special positioning of the bellow needs to be considered.

Both filters are identical regarding the performance data and fitting measurements. Therefore the C 16 143/2 provides the familiar original equipment quality of an air filter from MANN-FILTER.
