Information Produit n°43

VKJP 01011

Véhicules Légers

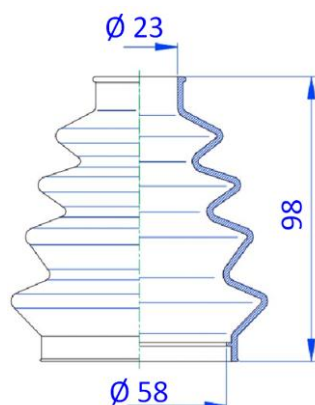

Soufflet semi-universel : VKJP 01011

Le soufflet semi-universel a une forme similaire à celle du soufflet d'origine.

Il n'est donc pas nécessaire de couper le soufflet semi-universel pour l'adapter au joint contrairement au soufflet universel.

### Important !

Soufflet pour joints avec un diamètre maximum de  $\varnothing$  70 mm.  
Ne convient pas aux joints tripodes.

Le VKJP 01010 est fabriqué à partir d'un mélange caoutchouc de haute qualité permettant ainsi un montage en toute fiabilité avec l'écarteur de soufflet pneumatique SKF VKN 402 sans avoir à démonter le joint homocinétique.

Pour un serrage rapide et fiable, SKF recommande l'utilisation de la pince de serrage pour colliers universels, le VKN 400. Un serrage incorrect des colliers peut provoquer une usure prématurée du joint homocinétique !

Ecarteur de soufflet : VKN 402

Pince de serrage : VKN 400
