

VKBA 3608

Technical Bulletin - September 2015

Renault: Laguna II, Laguna II Grandtour, Clio II ---> 2000-11-01

Mandatory placement of the ABS sensor holder in the center of the knuckle

OE Nb: Renault: 77 01 206 661, 77 01 208 060, 77 01 209 807, 40 21 020 84 R, 40 21 027 71 R

The wheel bearing kit VKBA 3608 has an ABS sensor holder included as a part of several accessories contained in the kit.

picture 1

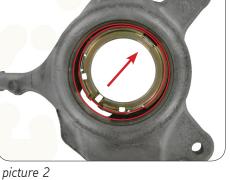

Correct mounting

The ABS sensor holder is placed centered, cannot damage the bearing and the ABS sensor will generate an accurate signal.

Wrong mounting

The ABS sensor is NOT placed centered, which causes a deformation of the ABS sensor holder and an abrasion of the ABS sealing. This could lead to a premature bearing failure and ABS signal problems (see pictures to the right).

holder

picture 2).

Mounting of the ABS sensor

When mounting the ABS sensor holder, it is mandatory to place it in the center of the knuckle, before pressing in the bearing (see picture 1). A wrong position of the holder causes an abrasion of the ABS sealing and leads to premature bearing failure due to the deformation of the ABS holder (see
